

Integrative Energy

VISION

We are creating a world-class energy company that achieves enviable financial performance through the integration of business wisdom, human power and potential, and new and leading-edge technologies. We will subsequently share our financial success with the communities in which we operate with the intent to help all involved achieve the highest and noblest of human aspirations.

MISSION

We are pursuing high risk/high reward/high impact energy prospects in North America with the potential to deliver the Vision. In the short-term, our focus will be oil & gas exploration and development in Texas.

JOURNEY

The Journey to delivering the Mission and Vision will be supported and leveraged by the following clearly-demonstrable achievements:

- *In the short-term*
 - *Demonstrating financial and technical success on our high impact oil and gas exploration and development prospects in Texas.*
 - *Leading-edge technologies have been successfully utilized via the development and use of direct-detection devices for natural resources in sub surface formation.*
 - *The Integrative Paradigm™ management and leadership model has been applied at all levels of the organization to unleash the people-power so critical for business success.*
 - *A community has been built around both our management and leadership philosophy and operations that will support and benefit from the delivery of our highest human goals, objectives and aspirations.*

- *In the longer term*
 - *New Energy Technologies have been developed that move us from the current mechanistic laws of physics towards application of a New Physics.*
 - *The Integrative Paradigm™ has been shared and applied to a broader community through the Integrative Energy Leadership Learning Centre*
